

COMED KARES
INNOVATION HUB

ComedKares

E V E N T C A L E N D A R

About ComedKares

ComedKares is an initiative by ComedK to help students of engineering, dental, and medical colleges choose the right career by building their competitiveness and exposing them to various opportunities available in the industry.

ComedKares offers courses designed along with industry experts and endorsed by VTU that will enhance the learner's 21st-century skills while also giving access to machines, tools and mentors to build products and solutions that positively impact the community.

ComedKares catalyzes the interaction between the community (industry and regional professional groups), industry experts and academic stakeholders for knowledge sharing and co-creating solutions through various programs spread across the year

COMEDKARES CENTRES World-class Innovation Hubs

ComedKares is establishing eight state-of-the-art Innovation Hubs across Karnataka, that empower students to become problem solvers, acquire competency in emerging technologies and develop solutions that have a positive impact on the community.

ComedKares will conduct structured programs at the Innovation Hubs to equip the students with practical experience and give them hands-on exposure to advanced technologies, tools and machinery.

Our Programs

Innovation & Design Thinking	6
Social Connect through Field Visit	8
Robotics	10
Internet of Things	12

Calendar of Events

INNOVATION & DESIGN THINKING

A Program that
Inspires you to
Tinker!

1 INNOVATION AND DESIGN THINKING – 1ST SEM

A PROGRAM THAT INSPIRES YOU TO TINKER!

COMEDKARES
PROGRAMS

A 12-week course centred on the concept of design thinking. Students are introduced to a world of tools to create functional prototypes.

Course Overview

- Week 1** Getting Started With Prototyping
- Week 2** Paper Prototyping
- Week 3** UI/UX Design
- Week 4** Power Tools & Materials 1
- Week 5** Power Tools & Materials 2
- Week 6** Basic Electronics
- Week 7** Microcontroller
- Week 8** Coding with Arduino
- Week 9** 3D CAD Modeling
- Week 10** 3D Printing
- Week 11** CNC Machine, Laser & Vinyl Cutting
- Week 12** Prototyping Challenge

Outcome

Apply the product design and development process to build prototypes

Acquire essential design skills such as 'sketching, CAD modeling and user interface design

Understand concepts of rapid prototyping and electronics circuit design

Community problem identification and solution design

Start Date: 15th May, 2023

Program Duration: 12 Weeks | 2 Hrs/Week

SOCIAL CONNECT THROUGH FIELD VISIT

First Step to
Become a
Changemaker!

2 SOCIAL CONNECT THROUGH FIELD VISIT – 2ND SEM

FIRST STEP TO BECOME A CHANGEMAKER!

A program designed to enable students to empathise with the community they live in. Understanding of community problems and designing sustainable solutions are at the core of the program.

Course Overview

- Week 1** Design Thinking
- Week 2** SDGs & Social Innovation
- Week 3** Product Design & Development
- Week 4** How to Conduct Research
- Week 5** Problem Selection & Mapping
- Week 6** Field Visit & Interview Techniques
- Week 7** Problem Analysis
- Week 8** Ideation
- Week 9** Pricing, Costing, Accounting & Business Model Canvas
- Week 10** Prototyping Part - 1
- Week 11** Prototyping Part - 2
- Week 12** Pitch Deck Creation

Outcome

Gain awareness of local problems in the community

Apply scientific methods to organise, 'analyse and define the problem

Design solutions for the identified problem in partnership with the community

Build solution prototypes

Start Date: 17th April, 2023

Program Duration: 12 Weeks | 2 Hrs/Week

ROBOTICS

A Program that
Inspires
You to Create!

3 ROBOTICS – 3RD SEM

A PROGRAM THAT INSPIRES YOU TO CREATE!

COMEDKARES
PROGRAMS

An exploration of Robotics - understanding the design, construction, operation and use of Robots

Course Overview

- Week 1** Getting started with Robotics systems
- Week 2** Motor Control
- Week 3** Sensor interface & Application
- Week 4** Jetson Nano OS installation
- Week 5** Fundamentals of Python Programming
- Week 6** Computer Vision OpenCV
- Week 7** Object Detection using OpenCV & HSV
- Week 8** Jetson Nano GPIO Interface
- Week 9** Serial communication between Jetson Nono and Arduino
- Week 10** Basic Motion with Jetson Nano
- Week 11** Computer Vision & Motion
- Week 12** Design Challenge

Outcome

Real time implementation of embedded systems

Understanding of a robot's environmental sensing and mobility

Developing real-time self navigating bots

Maximizing a robot's capability to detect and avoid obstacles

Start Date: 5th June, 2023

Program Duration: 12 Weeks | 2 Hrs/Week

INTERNET OF THINGS

Explore the
Interconnected
World!

4 INTERNET OF THINGS - 4TH SEM

EXPLORE THE INTERCONNECTED WORLD!

COMEDKARES
PROGRAMS

Understanding the fundamentals of the Internet of Things and the dynamics of connected devices. This program helps to understand and design solutions for the interconnected world.

Course Overview

- Week 1** Introduction to IoT
- Week 2** Application & Web Server interface
- Week 3** Client - Server Communication
- Week 4** Publish - Subscribe Communication
- Week 5** Building for a Use Case - 1
- Week 6** Realtime Database for IoT
- Week 7** Integration with Cloud Services
- Week 8** Building for a Use Case - 2
- Week 9** PCB Designing
- Week 10** Hardware Board Development
- Week 11** UI/UX Design for IoT Applications
- Week 12** Design Challenge

Outcome

Realtime implementation of embedded

Understanding of robots environmental sensing and mobility

Developing real-time self navigating bots

Maximizing robots adaptability to detect avoid obstacles

Start Date: 5th June, 2023

Program Duration: 12 Weeks | 2 Hrs/Week

ComedKares Events

The activities conducted for the centers are primarily centered on:

AWARENESS SERIES

Awareness Series - A knowledge series that focuses on creating awareness about the forthcoming booming industry trends and opportunities for the youth

- Career Opportunities Series, Fireside Chats

CONFIDENCE BUILDING SERIES

Confidence Building Series - Introduce students to technical and soft skill concepts to improve their skillsets, expand their opportunities, and promote personal growth and development

-Technical Skills - Workshops, Master Classes

-Non-technical Skills - Webinars on Soft Skills

PROBLEM-SOLVING SERIES

Problem-Solving Series - Introduction of various challenge-based programs to ignite the problem-solving ability in students, develop their critical thinking skills and help them think creatively thus enhancing their decision-making abilities

- Challenge Workshops, Hackathons, Innovation Challenges

CAREER OPPORTUNITIES SERIES:

Objectives:

1. Exposing students to various career opportunities available in the booming industries
2. Providing information about industry trends and the skills required to succeed in the field
3. Providing actionable points to students to get started on their interested career path

Benefits:

1. Increased understanding of the various career paths available in the engineering field
2. Enhanced knowledge of industry trends and the skills required to succeed in the field
3. Better preparation for the transition from academic life to a professional career

FIRESIDE CHAT

Objective:

1. Helping students understand the key elements of a successful startup, such as business planning, marketing, and fundraising
2. Encouraging creativity, innovation and problem-solving skills, and developing entrepreneurial skills, such as leadership, teamwork and adaptability, in students
3. Providing students with the opportunity to work on real-world projects, either individually or in teams

Benefits:

1. Opportunities to network with entrepreneurs, investors, and industry experts
2. Collaborative opportunities to work on real-world projects with other like-minded students
3. Access to potential job and internship opportunities in the startup ecosystem

WORKSHOPS – FOUNDATIONAL & INTERMEDIATE-LEVEL WORKSHOPS

Objective:

1. Developing technical skills in specific areas, such as programming, electronics, or data analysis
2. Providing hands-on experience with tools, equipment, and software commonly used in the engineering industry
3. Fostering a culture of lifelong learning and professional development

Benefits:

1. Enhanced technical skills and knowledge in specific areas, making them more competitive in the job market
2. Hands-on experience with tools, equipment, and software commonly used in the engineering industry

WEBINARS FOCUSED ON SOFT SKILLS

Objective:

1. To help engineering students understand the importance of soft skills in their careers and how they can be developed and refined over time.
2. To provide students with practical tips and strategies for developing their communication skills, including how to communicate effectively in different contexts, such as written and oral presentations, team meetings, and interpersonal interactions.
3. To help students develop leadership skills that are essential for managing projects, teams, and stakeholders, including techniques for delegating tasks, decision-making, and problem-solving.

Benefits:

1. Help students develop greater self-awareness, improving their ability to work effectively with others
2. Help students develop their leadership skills, making them more effective team members and)(leaders
3. Teach students how to communicate clearly and persuasively, improving their ability to convey complex ideas
4. Help engineering students develop the skills they need to advance their careers and achieve their professional goals

EVENTS FOR ASSOCIATED COLLEGES OF YELAHANKA

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma’s user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - “Building a Soccer Bot” Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - “Path of an Innovator” Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, “The Path of an Innovator”, will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It’s an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the Future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Topic - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building a Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Bengaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>21th MAR 2023</p>

MARCH 2023

<p>From Nervous to Confident: “Overcoming Interview Anxiety” Are you someone who gets nervous before a job interview? If so, you’re not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: “Creating Your First Web Page” ReimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Reimagine Waste Hackathon ReimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>25th MAR 2023 26th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>	<p>10.30 AM - 1.30 PM</p>	<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>

MAY 2023

<p>Career Paths in the SaaS industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts, and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>
<p>Advanced Figma Workshop The Advanced Figma Workshop is a hands-on session aimed at improving design skills using Figma. Participants will learn to create high-fidelity prototypes and advanced animations, and collaborate effectively. The workshop also covers tips and tricks to speed up the design process, and best practices for creating scalable design systems.</p>	<p>10.00 AM - 1.00 PM</p>	<p>28th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management</p> <p>Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming</p> <p>This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs</p> <p>In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ</p> <p>We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>
<p>CNC Woodworking</p> <p>This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>2.30 PM - 5.30 PM</p>	<p>18th JUN 2023</p>
<p>Career Opportunities in Virtual Reality</p> <p>This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>

JUNE 2023

<p>From Sensors to Smart Devices: A Hands-on Introduction to IoT Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>
<p>How to Avoid Procrastination Struggling with procrastination? Don’t worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you’ll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>

JULY 2023

<p>The Journey of Building a Successful SaaS Startup: Lessons Learned</p> <p>Join us for a fireside chat with successful SaaS startup founders as they share their journey and the valuable lessons learned along the way. From identifying market opportunities to building a team and securing funding, hear first-hand accounts of the challenges and rewards of starting a successful SaaS company.</p>	<p>3.30 PM - 4.30 PM</p>	<p>15th JULY 2023</p>
<p>Advanced Designing Workshop: Onshape</p> <p>This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>16th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry</p> <p>This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy</p> <p>The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers</p> <p>This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know This webinar would focus on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>
<p>Developing a Growth Mindset for Engineers This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>
<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma’s user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - “Building a Soccer Bot” Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - “Path of an Innovator” Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, “The Path of an Innovator”, will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality..</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It’s an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>CNC Woodworking This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>10.00 AM - 1.00 PM</p>	<p>5th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Advanced Designing Workshop: Onshape This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>12th MAR 2023</p>

MARCH 2023

<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Bengaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>21th MAR 2023</p>
<p>From Nervous to Confident: Overcoming Interview Anxiety Are you someone who gets nervous before a job interview? If so, you’re not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Reimagine Waste Hackathon ReimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>25th MAR 2023 26th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field..</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>

MAY 2023

<p>Career Paths in the SaaS industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Designing Products for the Community - Case Study Join our Designing Products for the Community webinar featuring a case study on a successful community-focused product. Explore how to identify community needs, develop solutions, and create impactful designs. Learn from experienced product designers and gain insights to apply to your own community projects.</p>	<p>7.30 PM - 8.30 PM</p>	<p>12th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>
<p>How to Conduct Field Research This webinar will provide participants with practical tips and strategies for conducting effective field research. Topics covered include planning and preparation, data collection methods, and analysis techniques. Participants will learn how to navigate the challenges and opportunities of conducting research in real-world settings.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th JUN 2023</p>
<p>Innovations in the Gaming Industry: Opportunities and Challenges for Startups Join us for a fireside chat on Innovations in the Gaming Industry. We will be discussing the current trends in the industry, the opportunities and challenges for startups, and how the gaming industry is evolving. Don't miss this opportunity to hear from industry experts and gain insights into the future of gaming.</p>	<p>3.30 PM - 4.30 PM</p>	<p>17th JUN 2023</p>

JUNE 2023

<p>Career opportunities in Virtual Reality This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-On Introduction to IoT Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>

JULY 2023

<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Problem Analysis - A Case Study In this webinar, participants will explore a case study on problem analysis, examining the steps taken to identify and analyze a complex organizational challenge. Through a detailed examination of the case study, participants will gain insights into effective problem-solving strategies and learn practical techniques for addressing complex problems in real-world settings.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Fundamentals of a Successful Pitch Deck This webinar will cover the key elements of a successful pitch deck, including how to craft a compelling narrative, choose the right visuals, and effectively communicate your message. Participants will learn tips and best practices for creating a pitch deck that grabs the attention of investors and helps them see the value in your business or idea.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>
<p>Developing a Growth Mindset for Engineers This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>

AUGUST 2023

<p>Advanced 3D Printing: Designing for Printability In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>
<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>

SEPTEMBER 2023

<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma’s user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - “Building a Soccer Bot” Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - “Path of an Innovator” Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, “The Path of an Innovator”, will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It’s an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>The Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building a Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Bengaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>21th MAR 2023</p>

MARCH 2023

<p>From Nervous to Confident: Overcoming Interview Anxiety Are you someone who gets nervous before a job interview? If so, you're not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Reimagine Waste Hackathon ReimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>25th MAR 2023 26th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>

MAY 2023

<p>Career Paths in the SaaS industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>From Concept to Launch: The Journey of an Aerospace Startup Join us for a fireside chat with the founders of an aerospace startup as they discuss their journey from concept to launch. Hear about the challenges they faced, the lessons they learned, and the successes they achieved along the way. This inspiring conversation is a must-attend event for anyone interested in entrepreneurship and aerospace innovation.</p>	<p>3.30 PM - 4.30 PM</p>	<p>20th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management</p> <p>Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming</p> <p>This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs</p> <p>In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ</p> <p>We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>

JUNE 2023

<p>Career Opportunities in Virtual Reality This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling..</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-on Introduction to IoT Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>

JULY 2023

<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 1.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>
<p>Developing a Growth Mindset for Engineers This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>
<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma’s user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - “Building a Soccer Bot” Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - “Path of an Innovator” Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, “The Path of an Innovator”, will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It’s an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the Future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building a Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>

MARCH 2023

<p>Round Table Implementation Discussion on “NEP 2020” - Bengaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>21st MAR 2023</p>
<p>From Nervous to Confident: Overcoming Interview Anxiety Are you someone who gets nervous before a job interview? If so, you’re not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover concepts of The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Reimagine Waste Hackathon ReimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>25th MAR 2023 26th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Inside the World of Electric Vehicle Startups: A Fireside Chat with Founders Join us for an exclusive fireside chat with founders from the electric vehicle (EV) startup industry. Gain insights on their journey, challenges, and strategies in establishing their companies. Learn about the future of EVs and explore opportunities in this rapidly growing industry. Don't miss out on this opportunity to hear from the experts themselves.</p>	<p>3.30 PM - 4.30 PM</p>	<p>22nd APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
--	-------------------------------------	---

MAY 2023

<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>
<p>Career Paths in the SaaS Industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>
<p>Advanced Figma Workshop The Advanced Figma Workshop is a hands-on session aimed at improving design skills using Figma. Participants will learn to create high-fidelity prototypes and advanced animations, and collaborate effectively. The workshop also covers tips and tricks to speed up the design process, and best practices for creating scalable design systems.</p>	<p>10.00 AM - 1.00 PM</p>	<p>28th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management</p> <p>Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming</p> <p>This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs</p> <p>In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ</p> <p>We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>
<p>CNC Woodworking</p> <p>This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>10.00 PM - 1.00 PM</p>	<p>18th JUN 2023</p>

JUNE 2023

<p>Career Opportunities in Virtual Reality</p> <p>This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-on Introduction to IoT</p> <p>Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions</p> <p>The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required</p> <p>The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond</p> <p>In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>

JULY 2023

<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Advanced Designing Workshop: Onshape This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>16th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers</p> <p>This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer</p> <p>This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module</p> <p>The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know</p> <p>This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>
<p>Developing a Growth Mindset for Engineers</p> <p>This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability</p> <p>In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact</p> <p>This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers</p> <p>This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>
<p>Building Your First Game: A Beginner's Guide to Unity</p> <p>This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers</p> <p>This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students</p> <p>This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds</p> <p>In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering</p> <p>This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma’s user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - “Building a Soccer Bot” Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - “Path of an Innovator” Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, “The Path of an Innovator”, will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It’s an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>The Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building a Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>CNC Woodworking This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>10.00 PM - 1.00 PM</p>	<p>5th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Advanced Designing Workshop: Onshape This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>12th MAR 2023</p>

MARCH 2023

<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>
<p>From Nervous to Confident: Overcoming Interview Anxiety Are you someone who gets nervous before a job interview? If so, you're not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Emerging Job Opportunities in the EV Industry for Job Seekers In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.s</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>

MAY 2023

<p>Career Paths in the SaaS Industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management</p> <p>Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming</p> <p>This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs</p> <p>In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ</p> <p>We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>

JUNE 2023

<p>Career Opportunities in Virtual Reality This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-On Introduction to IoT Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>

JULY 2023

<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers</p> <p>This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer</p> <p>This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module</p> <p>The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know</p> <p>This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>
<p>Building a Virtual Reality Startup from Scratch: Challenges and Opportunities</p> <p>Join our fireside chat to hear the story of building a virtual reality startup from scratch. Our guest speaker will discuss the challenges and opportunities they faced, including funding, technology, and market adoption. Don't miss this opportunity to learn from the experiences of a successful entrepreneur and gain insights into the exciting world of virtual reality startups..</p>	<p>3.30 PM - 4.30 PM</p>	<p>19th AUG 2023</p>
<p>Developing a Growth Mindset for Engineers</p> <p>This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability</p> <p>In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>

<p>Engineering Careers with a Social Impact This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>
---	-------------------------------------	--

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>
<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>

SEPTEMBER 2023

<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma's user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - "Building a Soccer Bot" Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - "Path of an Innovator" Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, "The Path of an Innovator", will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It's an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the Future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>The Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building a Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>CNC Woodworking This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>10.00 AM - 1.00 PM</p>	<p>5th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Advanced Designing Workshop: Onshape This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>12th MAR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Bengaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>14th MAR 2023</p>

MARCH 2023

<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>
<p>From Nervous to Confident: Overcoming Interview Anxiety Are you someone who gets nervous before a job interview? If so, you're not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover concepts of The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
--	--	--

MAY 2023

<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>
<p>Career Paths in the SaaS Industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Designing Products for the Community - Case Study Join our Designing Products for the Community webinar featuring a case study on a successful community-focused product. Explore how to identify community needs, develop solutions, and create impactful designs. Learn from experienced product designers and gain insights to apply to your own community projects.</p>		<p>12th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management</p> <p>Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming</p> <p>This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs</p> <p>In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ</p> <p>We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>
<p>How to Conduct Field Research</p> <p>This webinar will provide participants with practical tips and strategies for conducting effective field research. Topics covered include planning and preparation, data collection methods, and analysis techniques. Participants will learn how to navigate the challenges and opportunities of conducting research in real-world settings.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th JUN 2023</p>

JUNE 2023

<p>Career Opportunities in Virtual Reality This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-On Introduction to IoT Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>

JULY 2023

<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Problem Analysis - A Case Study In this webinar, participants will explore a case study on problem analysis, examining the steps taken to identify and analyze a complex organizational challenge. Through a detailed examination of the case study, participants will gain insights into effective problem-solving strategies and learn practical techniques for addressing complex problems in real-world settings.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Fundamentals of a Successful Pitch Deck This webinar will cover the key elements of a successful pitch deck, including how to craft a compelling narrative, choose the right visuals, and effectively communicate your message. Participants will learn tips and best practices for creating a pitch deck that grabs the attention of investors and helps them see the value in your business or idea.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>

AUGUST 2023

<p>Developing a Growth Mindset for Engineers This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>

SEPTEMBER 2023

<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Building a Successful Cybersecurity Startup: Tips and Strategies from Founders Join us for a fireside chat with successful cybersecurity startup founders. We'll discuss tips and strategies for building a successful cybersecurity startup, including identifying market gaps, finding funding, and building a strong team. Learn from the experiences of founders who have successfully navigated the challenges of launching and growing a cybersecurity startup.</p>	<p>3.30 PM - 4.30 PM</p>	<p>16th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

FEBRUARY 2023

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma's user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - "Building a Soccer Bot" Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - "Path of an Innovator" Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, "The Path of an Innovator", will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It's an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>Robotics Industry and the Future of Work</p> <p>The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building a Pick & Place Robot”</p> <p>Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Bengaluru Cluster</p> <p>The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>7th MAR 2023</p>
<p>The Power of Communication</p> <p>Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies”</p> <p>In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Career Trends in the E-commerce Industry for Beginners</p> <p>During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>

MARCH 2023

<p>From Nervous to Confident: Overcoming Interview Anxiety</p> <p>Are you someone who gets nervous before a job interview? If so, you're not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover concepts of The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page</p> <p>In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers</p> <p>In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
---	-------------------------------------	---

MAY 2023

<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>
<p>Career Paths in the SaaS Industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>
<p>Designing for Digital: An Interactive Workshop on UX Design Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>
<p>Advanced Figma Workshop The Advanced Figma Workshop is a hands-on session aimed at improving design skills using Figma. Participants will learn to create high-fidelity prototypes and advanced animations, and collaborate effectively. The workshop also covers tips and tricks to speed up the design process, and best practices for creating scalable design systems.</p>	<p>10.00 AM - 1.00 PM</p>	<p>28th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>
<p>Developing Self-Awareness and Self-Regulation for a Higher EQ We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>
<p>CNC Woodworking This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>10.00 AM - 1.00 PM</p>	<p>18th JUN 2023</p>

JUNE 2023

<p>Career Opportunities in Virtual Reality</p> <p>This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-On Introduction to IoT</p> <p>Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions</p> <p>The “How to Ask the Right Question” webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required</p> <p>The talk on “Preparing for a Career in Cybersecurity: Skills and Education Required” will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today’s digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond</p> <p>In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>

JULY 2023

<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Advanced Designing Workshop: Onshape This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>16th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>
<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Fundamentals of a Successful Pitch Deck This webinar will cover the key elements of a successful pitch deck, including how to craft a compelling narrative, choose the right visuals, and effectively communicate your message. Participants will learn tips and best practices for creating a pitch deck that grabs the attention of investors and helps them see the value in your business or idea.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th AUG 2023</p>
<p>Print-it-Yourself: Building Your First 3d Printed Module The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>

AUGUST 2023

<p>Developing a Growth Mindset for Engineers This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>

SEPTEMBER 2023

<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>
<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>

<p>Figma Workshop Accelerate your design career with UX/UI design and Figma tools. This workshop is the perfect introduction to Figma, the industry-leading design software. Participants will learn the basics of Figma's user interface and how to create their own projects, including adding objects, shapes, and icons. Through hands-on activities and guided instruction, students will be able to quickly understand the essentials of Figma and make the most of it in their design work. With this workshop, students can jumpstart their design projects with confidence and create amazing visuals with ease.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd FEB 2023</p>
<p>Robosoccer - "Building a Soccer Bot" Unleash your creativity and build the ultimate soccer robot in this one-of-a-kind workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th FEB 2023</p>
<p>Wednesday Talk - "Path of an Innovator" Unlock the secrets to combining innovation, methodology and proven approaches for product success. This student workshop, "The Path of an Innovator", will provide attendees with the skills and insights they need to successfully pursue innovative ideas and create groundbreaking solutions. In this talk, participants will learn the fundamentals of active problem-solving, methods to generate and develop ideas, and strategies to bring their work to life. Attendees will also gain an understanding of the mindset of an innovator and the resources necessary to make their dreams a reality.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th FEB 2023</p>
<p>GIT Hub Expand your coding horizons with the workshop on GitHub and its use as a developer tool. This student workshop on GitHub is the perfect opportunity for students to learn about open source software development. Attendees will learn about the basics of version control, Git commands and workflows, and how to use GitHub to collaborate with others. It's an interactive and fun way for students to develop their skills in software engineering and explore the exciting world of open source. Participants can expect a stimulating day of learning, group work and networking to gain valuable insights into the world of software engineering.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th FEB 2023</p>

FEBRUARY 2023

<p>Online Webinar - “Emerging Career Trends from the future” Stay ahead of the curve and register for the webinar on the future of work & career trends. Are you a student looking to stay ahead of the curve? Join this webinar to explore the changing landscape of careers in the future. Learn about emerging trends and developments in the job market and gain insights to help you make an informed decision for your future. From robots to remote work, this webinar is an essential guide to finding a career that fits your potential. Get the knowledge and confidence to take the next step in your career.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th FEB 2023</p>
<p>Online Webinar - “Journey from Prototype to MVP” Are you an aspiring entrepreneur looking to take your ideas from prototype to MVP? Join us for an exclusive webinar and learn about the journey to success. Our experts will guide you through the process, giving you the tools and tips you need to turn your prototype into a Minimum Viable Product. We will also discuss the challenges you may face and provide guidance on how to overcome them. Don't miss out on this unique opportunity to unlock your full potential!</p>	<p>7.30 PM - 8.30 PM</p>	<p>23th FEB 2023</p>
<p>Workshop - “Line Follower Robot” Join the robotics revolution and learn to build a line-following robot in this hands on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th FEB 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Mangaluru Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India's National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals of regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>28th FEB 2023</p>

MARCH 2023

<p>Robotics Industry and the Future of Work The field of robotics is rapidly advancing, and its impact on the future of work cannot be underestimated. In this talk, we will explore the current state of the robotics industry, including its most innovative developments and trends. While some fear that robots will replace human workers, others believe that robots will simply change the nature of work, creating new opportunities for skilled workers. We will explore the potential benefits and challenges of a more automated workforce and discuss how individuals and organizations can adapt to these changes.</p>	<p>7.30 PM - 8.30 PM</p>	<p>2nd MAR 2023</p>
<p>Workshop - “Building Pick & Place Robot” Experience the thrill of building a pick & place robot in this hands-on workshop. The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>4th MAR 2023</p>
<p>The Power of Communication Communication is one of the most powerful skills any person can possess. In this webinar on The Power of Communication, you will learn how to effectively communicate in a variety of situations. The webinar will cover topics such as active listening, understanding body language, and speaking effectively. By the end, you will have the skills to communicate more effectively and build strong relationships.</p>	<p>7.30 PM - 8.30 PM</p>	<p>9th MAR 2023</p>
<p>Advanced Git Techniques: “Mastering Branching and Merging Strategies” In this workshop, you will learn advanced Git techniques to manage branching and merging strategies. Topics covered include rebasing, cherry-picking, and resolving conflicts. You will also learn best practices for collaborating with other developers, managing large codebases, and using Git efficiently. This workshop is suitable for developers with some experience using Git.</p>	<p>2.30 PM - 5.30 PM</p>	<p>11th MAR 2023</p>
<p>Career Trends in the E-commerce Industry for Beginners During this talk, we will explore the various job opportunities available in the e-commerce industry, such as marketing, sales, customer service, logistics, and technology. We will also delve into the latest trends in e-commerce, such as social media selling, mobile commerce, and personalization.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th MAR 2023</p>
<p>Robotics Startups: How to Build a Successful Business from Engineering Skills Join us for a fireside chat with successful robotics startup founders as they share their experiences and insights on building a successful business from engineering skills. Our speakers will discuss challenges they faced and lessons learned, and share tips for aspiring entrepreneurs in the robotics industry. Don't miss this opportunity to learn from their stories of success!</p>	<p>3.30 PM - 4.30 PM</p>	<p>18th MAR 2023</p>

MARCH 2023

<p>From Nervous to Confident: Overcoming Interview Anxiety</p> <p>Are you someone who gets nervous before a job interview? If so, you're not alone. Interview anxiety is a common problem, but the good news is that it can be overcome. In this talk, we will discuss strategies to help you go from nervous to confident in your job interviews. We will cover techniques to help you prepare for your interview, such as researching the company and practicing common interview questions. We will also explore ways to manage anxiety, such as deep breathing and positive self-talk. By the end of this talk, you will have a better understanding of how to overcome interview anxiety and approach your next job interview with confidence. The topic shall also cover concepts of The Importance of Nonverbal Communication in Job Interviews: Body Language and Dressing for Success.</p>	<p>7.30 PM - 8.30 PM</p>	<p>23rd MAR 2023</p>
<p>Introduction to Web Development: Creating Your First Web Page</p> <p>In this workshop, participants will be introduced to the basics of web development, including HTML and CSS. They will learn how to create a simple web page using HTML tags and style it with CSS. Participants will also learn how to preview and publish their web page to the internet. By the end of the workshop, attendees will have built their own basic web page and have a good understanding of the fundamentals of web development. No prior experience with web development is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>25th MAR 2023</p>
<p>Emerging Job Opportunities in the EV industry for Job Seekers</p> <p>In this talk, we will discuss the emerging job opportunities in the EV industry, the skills required to succeed in this field, and the impact of EVs on the job market. We will also explore the various career paths available, such as engineering, manufacturing, sales and marketing, and research and development. By the end of this talk, attendees will have a better understanding of the exciting opportunities available in the EV industry and how they can position themselves for success in this growing field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>30th MAR 2023</p>

APRIL 2023

<p>Reimagine Waste Hackathon REimagiNEWaste is an immersive hackathon, prototyping and incubation experience, pioneered by Waste Impact Trust, aiming to co-create innovative inclusive solutions for various aspects of the waste problem that is facing us.</p>		<p>1st APR 2023 2nd APR 2023</p>
<p>Round Table Implementation Discussion on “NEP 2020” - Kalaburagi Cluster The Round Table on NEP 2020 is an interactive discussion session that focuses on India’s National Education Policy (NEP) 2020. The round table brings together vice chancellors, principals oOf regional institution, and stakeholders from various fields to share their insights, opinions, and perspectives on the new education policy. The round table provides a platform for participants to discuss the key aspects of the NEP 2020, including changes in school education, higher education, teacher training, and vocational education. The discussion also covers the challenges and opportunities presented by the NEP 2020 and the implementation strategies required to achieve its objectives.</p>	<p>3.00 PM - 5.00 PM</p>	<p>4th APR 2023</p>
<p>How to Focus on Skillset Building along with Academics Success in the modern world requires more than just academic knowledge. Building a well-rounded skillset is just as important. In the webinar on How to Focus on Skillset Building Along with Academics, you will learn how to identify and develop your existing skills and discover new ones. The webinar will cover topics such as exploring career paths, developing soft skills, and setting yourself up for success. By the end, you will have the skills to develop a skillset that will help you succeed in any field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th APR 2023</p>
<p>Autonomous Maze Solver - I The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th APR 2023</p>
<p>The Future of Aerospace: Trends and Opportunities for Students This talk provides an overview of the current state of the aerospace industry, including emerging technologies and innovations, and highlights some of the most promising career paths for students.</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th APR 2023</p>
<p>Building Dynamic Web Applications: An Intermediate Workshop on Web Development In this intermediate workshop on web development, you will learn how to build dynamic web applications using modern web technologies such as HTML, CSS, JavaScript and React. Topics covered include building responsive layouts, handling user input, and consuming APIs. You will also learn how to deploy your web applications to the cloud. This workshop is suitable for developers with some experience in web development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>15th APR 2023</p>

APRIL 2023

<p>How Communication can Make or Break the Deal Discover the power of communication in making or breaking a deal in this insightful session. Are you looking to take your communication skills to the next level? Join us for a student webinar and learn how to effectively communicate with others to make or break a deal. The expert will guide you through the fundamentals of communication, such as active listening and creating persuasive messages, to help you achieve success in any professional environment. Learn how to maximize the impact of your communication and become a master of negotiations. Sign up today and take your communication skills to the next level.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th APR 2023</p>
<p>Inside the World of Electric Vehicle Startups: A Fireside Chat with Founders Join us for an exclusive fireside chat with founders from the electric vehicle (EV) startup industry. Gain insights on their journey, challenges, and strategies in establishing their companies. Learn about the future of EVs and explore opportunities in this rapidly growing industry. Don't miss out on this opportunity to hear from the experts themselves.</p>	<p>3.30 PM - 4.30 PM</p>	<p>22nd APR 2023</p>
<p>Career Opportunities in the Semiconductor Industry Discussion of various career paths in the semiconductor industry, including engineering, research and development, manufacturing, marketing, and sales. Additionally, we cover the skills and educational background required for these roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th APR 2023</p>
<p>Introduction to Mobile Development: Building Your First App This workshop will introduce students to mobile app development, including the basics of Java and Android Studio. Participants will learn how to create a simple app and navigate the Android Studio interface. They will also learn how to add features to their app, such as user input and image display. By the end of the workshop, attendees will have built their first mobile app and have a good understanding of the fundamentals of mobile development. No prior experience with mobile development is necessary, but some familiarity with basic programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th APR 2023</p>

MAY 2023

<p>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, and Time-bound as students The workshop Setting SMART Goals for students focuses on teaching them how to create effective goals that are Specific, Measurable, Achievable, Relevant, and Time-bound. Students will learn how to identify their personal and academic goals and break them down into smaller, manageable steps that can be tracked and measured for progress. They will also learn how to prioritize their goals and align them with their values and interests. Through interactive activities and discussions, students will gain the skills and confidence to set SMART goals that can help them succeed in school and beyond.</p>	<p>7.30 PM - 8.30 PM</p>	<p>4th MAY 2023</p>
---	------------------------------	------------------------------------

MAY 2023

<p>Autonomous Maze Solver - II The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>6th MAY 2023</p>
<p>Career Paths in the SaaS Industry The SaaS industry offers diverse job opportunities, from software developers to customer service representatives to sales and marketing professionals. Discussing different career paths can help students identify where they may fit within the industry and what skills are required for various roles.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th MAY 2023</p>
<p>Designing Products for the Community - Case Study Join our Designing Products for the Community webinar featuring a case study on a successful community-focused product. Explore how to identify community needs, develop solutions, and create impactful designs. Learn from experienced product designers and gain insights to apply to your own community projects.</p>		<p>1th MAY 2023</p>
<p>Intermediate Mobile App Development: Building Apps with Advanced Features In this intermediate workshop on mobile app development, you will learn how to build mobile apps with advanced features using modern mobile app development frameworks such as React Native. Topics covered include building native user interfaces, working with device hardware and sensors, and integrating with APIs. You will also learn how to publish your mobile apps to app stores. This workshop is suitable for developers with some experience in mobile app development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>13th MAY 2023</p>
<p>How to Manage Time Effectively The “How to Manage Time Effectively” webinar is designed to help participants learn how to optimize their use of time to be more productive and achieve their goals. During the webinar, attendees will learn the importance of effective time management, and how to do so through practical and actionable strategies.</p>	<p>7.30 PM - 8.30 PM</p>	<p>18th MAY 2023</p>
<p>From Concept to Launch: The Journey of an Aerospace Startup Join us for a fireside chat with the founders of an aerospace startup as they discuss their journey from concept to launch. Hear about the challenges they faced, the lessons they learned, and the successes they achieved along the way. This inspiring conversation is a must-attend event for anyone interested in entrepreneurship and aerospace innovation.</p>	<p>3.30 PM - 4.30 PM</p>	<p>20th MAY 2023</p>
<p>Future Career Prospects in the IoT Industry The talk focuses on the various career paths and job opportunities available in the IoT industry, ranging from IoT engineers to data analysts, software developers, cybersecurity experts and more. It also discusses the importance of interdisciplinary skills and how they can help students excel in the field.</p>	<p>7.30 PM - 8.30 PM</p>	<p>25th MAY 2023</p>

MAY 2023

<p>Designing for Digital: An Interactive Workshop on UX Design</p> <p>Join the code craft revolution and elevate your UI skills in this hands-on workshop. This student workshop is designed to teach the fundamentals of user interface (UI) design. Participants will learn the basics of UI and UX design, as well as create a mock design for a website or mobile app. Through this workshop, students will gain hands-on experience in the design process and will have the opportunity to network with other UI design professionals. This workshop is a great introduction to the world of UI design and is suitable for both beginners and advanced users.</p>	<p>2.30 PM - 5.30 PM</p>	<p>27th MAY 2023</p>
<p>Advanced Figma Workshop</p> <p>The Advanced Figma Workshop is a hands-on session aimed at improving design skills using Figma. Participants will learn to create high-fidelity prototypes and advanced animations, and collaborate effectively. The workshop also covers tips and tricks to speed up the design process, and best practices for creating scalable design systems.</p>	<p>10.00 AM - 1.00 PM</p>	<p>28th MAY 2023</p>

JUNE 2023

<p>Elements of Team Management</p> <p>Managing a team of people can be a challenging task, but the right team management practices can help you achieve your goals. In the webinar on Elements of Team Management, you will learn the fundamentals of team management, such as building team cohesion and effective communication. The webinar will cover topics such as setting expectations, delegating tasks, and providing feedback. By the end, you will have the knowledge and skills to successfully manage any team and achieve optimal results.</p>	<p>7.30 PM - 8.30 PM</p>	<p>1st JUN 2023</p>
<p>Building an Image Processing Robot</p> <p>The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>3rd JUN 2023</p>
<p>Emerging Career Trends in Gaming</p> <p>This topic focuses on the latest advancements in the gaming industry, such as virtual reality, augmented reality, mobile gaming, esports, and social gaming. It discusses the potential opportunities and challenges associated with these trends.</p>	<p>7.30 PM - 8.30 PM</p>	<p>8th JUN 2023</p>
<p>Usability Testing: How to Evaluate and Improve Your Designs</p> <p>In this workshop, you will learn how to conduct usability testing to evaluate and improve your designs. Topics covered include defining usability goals, recruiting participants, designing and conducting tests, and analyzing results. You will also learn how to use different testing methods such as think-aloud protocols, surveys, and A/B testing. This workshop is suitable for designers and developers interested in improving the usability of their products.</p>	<p>2.30 PM - 5.30 PM</p>	<p>10th JUN 2023</p>

JUNE 2023

<p>Developing Self-Awareness and Self-Regulation for a Higher EQ We will discuss strategies for building emotional intelligence, including self-awareness, self-regulation, motivation, empathy, and social skills. We will also cover the benefits of having a high EQ, such as better communication, stronger relationships, and greater resilience in the face of challenges. By the end of this talk, attendees will have a better understanding of how to build their emotional quotient and apply it to their personal and professional lives.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JUN 2023</p>
<p>How to Conduct Field Research This webinar will provide participants with practical tips and strategies for conducting effective field research. Topics covered include planning and preparation, data collection methods, and analysis techniques. Participants will learn how to navigate the challenges and opportunities of conducting research in real-world settings.</p>	<p>7.30 PM - 8.30 PM</p>	<p>16th JUN 2023</p>
<p>Innovations in the Gaming Industry: Opportunities and Challenges for Startups Join us for a fireside chat on Innovations in the Gaming Industry. We will be discussing the current trends in the industry, the opportunities and challenges for startups, and how the gaming industry is evolving. Don't miss this opportunity to hear from industry experts and gain insights into the future of gaming.</p>	<p>3.30 PM - 4.30 PM</p>	<p>17th JUN 2023</p>
<p>CNC Woodworking This workshop provides an in-depth understanding of advanced CNC woodworking techniques using computer-aided design (CAD) software and computer numerical control (CNC) machines. Students will learn to program, operate and optimize CNC routers to create complex designs, enabling them to create accurate and intricate woodworking projects with precision and efficiency.</p>	<p>10.00 AM - 1.00 PM</p>	<p>18th JUN 2023</p>
<p>Career Opportunities in Virtual Reality This topic explores various career opportunities available in the virtual reality industry, such as game design, simulation, augmented reality, and immersive storytelling.</p>	<p>7.30 PM - 8.30 PM</p>	<p>22nd JUN 2023</p>
<p>From Sensors to Smart Devices: A Hands-On Introduction to IoT Join us for a hands-on workshop on the Internet of Things (IoT) and learn how to connect sensors to create smart devices. Participants will work with basic electronics components, such as sensors and microcontrollers, and learn how to program them to collect and transmit data. We will also explore the different IoT platforms and protocols, such as MQTT and Node-RED. By the end of the workshop, attendees will have a good understanding of the basics of IoT and have built their own smart device. No prior experience with IoT or electronics is necessary.</p>	<p>2.30 PM - 5.30 PM</p>	<p>24th JUN 2023</p>
<p>The Art of Asking the Right Questions The "How to Ask the Right Question" webinar is a training session designed to help participants develop their questioning skills to better communicate, problem-solve, and achieve their goals. During the webinar, attendees will learn the importance of asking the right questions, and how to do so effectively.</p>	<p>7.30 PM - 8.30 PM</p>	<p>29th JUN 2023</p>

JULY 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>1st JULY 2023</p>
<p>Preparing for a Career in Cybersecurity: Skills and Education Required The talk on "Preparing for a Career in Cybersecurity: Skills and Education Required" will focus on providing students with valuable insights into the skills and education required to pursue a successful career in the cybersecurity industry. The speaker will start by providing an overview of the cybersecurity industry, highlighting its scope and importance in today's digital world.</p>	<p>7.30 PM - 8.30 PM</p>	<p>6th JULY 2023</p>
<p>Creating Smart Environments with IoT: Home Automation and Beyond In this workshop, you will learn how to create smart environments with the Internet of Things (IoT) technology. Topics covered include designing and building IoT devices, using sensors and actuators, integrating with voice assistants, and creating home automation systems. You will also learn how to secure and manage your IoT devices. This workshop is suitable for developers interested in building IoT applications.</p>	<p>2.30 PM - 5.30 PM</p>	<p>8th JULY 2023</p>
<p>How to Avoid Procrastination Struggling with procrastination? Don't worry, this webinar will provide you with valuable insights on how to overcome it. Learn how to prioritize tasks, establish achievable goals, and gain control over your time. Through practical examples, you'll understand how to maximize productivity and break the habit of procrastination. Join now and start taking charge of your future!</p>	<p>7.30 PM - 8.30 PM</p>	<p>13th JULY 2023</p>
<p>Problem Analysis - A Case Study In this webinar, participants will explore a case study on problem analysis, examining the steps taken to identify and analyze a complex organizational challenge. Through a detailed examination of the case study, participants will gain insights into effective problem-solving strategies and learn practical techniques for addressing complex problems in real-world settings.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th JULY 2023</p>
<p>The Journey of Building a Successful SaaS Startup: Lessons Learned Join us for a fireside chat with successful SaaS startup founders as they share their journey and the valuable lessons learned along the way. From identifying market opportunities to building a team and securing funding, hear first-hand accounts of the challenges and rewards of starting a successful SaaS company.</p>	<p>7.30 PM - 8.30 PM</p>	<p>15th JULY 2023</p>
<p>Advanced Designing Workshop: Onshape This workshop focuses on advanced designing techniques using the cloud-based CAD software Onshape. Students will learn how to create complex 3D models, collaborate with team members, and use advanced features such as configurations and assemblies. The workshop will provide hands-on experience and practical applications for designing in Onshape.</p>	<p>10.00 AM - 1.00 PM</p>	<p>16th JULY 2023</p>
<p>Engineering a Healthier Future: The Role of Engineers in the Healthcare Industry This webinar focuses on the critical role that engineers play in the healthcare industry. It explores the various ways in which engineers contribute to improving patient care, reducing costs, and enhancing the overall efficiency of the healthcare system.</p>	<p>7.30 PM - 8.30 PM</p>	<p>20th JULY 2023</p>

JULY 2023

<p>CNC - Machining Made Easy The CNC workshop is a hands-on training session that focuses on teaching participants the fundamentals of Computer Numerical Control (CNC) machining. In this workshop, attendees will learn about the basics of CNC, including programming, tool selection, and machining parameters. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own CNC projects. Participants will learn about the different types of CNC machines, how to read and interpret CNC programs, and how to operate a CNC machine safely.</p>	<p>2.30 PM - 5.30 PM</p>	<p>22nd JULY 2023</p>
<p>Developing Leadership Skills for Engineers This webinar explores the different leadership skills required for success in engineering, including how to motivate and inspire teams, how to manage conflicts, and how to develop a strategic vision.</p>	<p>7.30 PM - 8.30 PM</p>	<p>27th JULY 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>29th JULY 2023</p>

AUGUST 2023

<p>Exploring Non-Traditional Career Paths for Engineers This webinar explores alternative career paths for engineering students, outside of the traditional engineering industries. The speaker will highlight fields such as finance, consulting, entrepreneurship, and public service, and discuss the skills and experience required to succeed in them.</p>	<p>7.30 PM - 8.30 PM</p>	<p>3rd AUG 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>5th AUG 2023</p>
<p>Building Your Personal Brand as an Engineer This webinar provides tips and strategies for engineering students to build their personal brand, including how to develop a strong online presence, how to network effectively, and how to showcase their skills and experience.</p>	<p>7.30 PM - 8.30 PM</p>	<p>10th AUG 2023</p>
<p>Fundamentals of a Successful Pitch Deck This webinar will cover the key elements of a successful pitch deck, including how to craft a compelling narrative, choose the right visuals, and effectively communicate your message. Participants will learn tips and best practices for creating a pitch deck that grabs the attention of investors and helps them see the value in your business or idea.</p>	<p>7.30 PM - 8.30 PM</p>	<p>11th AUG 2023</p>

AUGUST 2023

<p>Print-it-Yourself: Building Your First 3d Printed Module</p> <p>The 3D printing workshop is a hands-on training session that focuses on teaching participants the fundamentals of 3D printing. In this workshop, attendees will learn about the various aspects of 3D printing, including design software, 3D modeling, printing materials, and the printing process itself. The workshop is led by experienced instructors who will provide participants with the knowledge and tools needed to create their own 3D printed objects. Participants will learn about the different types of 3D printers, how to use 3D modeling software, and how to select appropriate materials for their projects.</p>	<p>2.30 PM - 5.30 PM</p>	<p>12th AUG 2023</p>
<p>Career Paths in Mechanical Engineering: What You Need to Know</p> <p>This webinar focuses on the different career paths available to mechanical engineering students, including areas such as product design, manufacturing, and materials science.</p>	<p>7.30 PM - 8.30 PM</p>	<p>17th AUG 2023</p>
<p>Building a Virtual Reality Startup from Scratch: Challenges and Opportunities</p> <p>Join our fireside chat to hear the story of building a virtual reality startup from scratch. Our guest speaker will discuss the challenges and opportunities they faced, including funding, technology, and market adoption. Don't miss this opportunity to learn from the experiences of a successful entrepreneur and gain insights into the exciting world of virtual reality startups.</p>	<p>3.30 PM - 4.30 PM</p>	<p>19th AUG 2023</p>
<p>Developing a Growth Mindset for Engineers</p> <p>This webinar focuses on the importance of having a growth mindset for engineers, including how to embrace failure as a learning opportunity, how to develop a love of learning, and how to overcome self-doubt and imposter syndrome.</p>	<p>7.30 PM - 8.30 PM</p>	<p>24th AUG 2023</p>
<p>Advanced 3D Printing: Designing for Printability</p> <p>In this workshop, you will learn advanced 3D printing techniques for designing models that are optimized for printability. Topics covered include designing for strength, using support structures, optimizing print orientation, and choosing appropriate materials. You will also learn how to troubleshoot common printing issues and fine-tune printer settings. This workshop is suitable for designers and makers with some experience in 3D printing.</p>	<p>2.30 PM - 5.30 PM</p>	<p>26th AUG 2023</p>
<p>Engineering Careers with a Social Impact</p> <p>This webinar explores the different career opportunities for engineering students to make a social impact. The speaker will discuss the role of engineering in addressing global challenges such as climate change, healthcare, and poverty, and highlight the various career paths available in these areas.</p>	<p>7.30 PM - 8.30 PM</p>	<p>31st AUG 2023</p>

SEPTEMBER 2023

<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>2nd SEP 2023</p>
<p>Critical Thinking and Problem-Solving Skills for Engineers This webinar focuses on the importance of critical thinking and problem-solving skills for engineers, including how to analyze data, how to think creatively, and how to make effective decisions.</p>	<p>7.30 PM - 8.30 PM</p>	<p>7th SEP 2023</p>
<p>Building Your First Game: A Beginner's Guide to Unity This workshop is aimed at students who are new to game development and want to learn how to create their first game using Unity. Participants will learn how to use Unity's interface, navigate the software, create 2D and 3D environments, add characters, and program simple interactions. They will also learn about game mechanics such as player controls, camera movement, and scoring systems. By the end of the workshop, attendees will have a basic understanding of game development and will have built their own simple game. No prior experience is required, but some familiarity with programming concepts is recommended.</p>	<p>2.30 PM - 5.30 PM</p>	<p>9th SEP 2023</p>
<p>Women in Engineering: Breaking Barriers and Building Careers This webinar focuses on the unique challenges and opportunities facing women in the engineering industry. The speaker will discuss topics such as mentorship, networking, and overcoming gender bias.</p>	<p>7.30 PM - 8.30 PM</p>	<p>14th SEP 2023</p>
<p>Building a Successful Cybersecurity Startup: Tips and Strategies from Founders Join us for a fireside chat with successful cybersecurity startup founders. We'll discuss tips and strategies for building a successful cybersecurity startup, including identifying market gaps, finding funding, and building a strong team. Learn from the experiences of founders who have successfully navigated the challenges of launching and growing a cybersecurity startup.</p>	<p>3.30 PM - 4.30 PM</p>	<p>16th SEP 2023</p>
<p>Mastering Public Speaking for Engineering Students This webinar provides tips on how to improve public speaking skills, including how to prepare and rehearse presentations, how to engage and connect with audiences, and how to handle nerves and anxiety.</p>	<p>7.30 PM - 8.30 PM</p>	<p>21st SEP 2023</p>
<p>Advanced Game Design: Building Engaging and Immersive Worlds In this workshop, you will learn advanced game design techniques for building engaging and immersive game worlds. Topics covered include level design, game mechanics, player experience, and storytelling. You will also learn how to use game engines such as Unity and Unreal Engine to create and publish your games. This workshop is suitable for game designers and developers with some experience in game development.</p>	<p>2.30 PM - 5.30 PM</p>	<p>23rd SEP 2023</p>

SEPTEMBER 2023

<p>Maximizing Your Internship Experience in Engineering This webinar provides tips and strategies for engineering students to make the most out of their internship experiences. The speaker will cover topics such as networking, building relationships, and gaining valuable skills.</p>	<p>7.30 PM - 8.30 PM</p>	<p>28th SEP 2023</p>
<p>IIT Challenge Based Workshop The workshop introduces students to the most competitive challenges conducted across the highly reputed Indian Institutes of Technology and teaches students how to solve them. The brief workshop will teach students to build the robot, program it and participate in the challenge.</p>	<p>2.30 PM - 5.30 PM</p>	<p>30th SEP 2023</p>
